

Great Ocean Road

Separation Creek Bridge

15 July 2015

As part of the \$50 million Great Ocean Road improvements funded by the State and Federal governments, VicRoads will be replacing the existing Separation Creek Bridge and repairing the road pavement on either side of the bridge.

Roadworks

One kilometre of the Great Ocean Road will be repaired to improve the road and eliminate potholes and rough areas. This will cover approximately 500 metres either side of the Separation Creek Bridge. The roadworks are scheduled for November and December.

Bridgeworks

The existing bridge was built in the 1960s, will be replaced with a new single span bridge and footway. The footway will be separated from traffic by a steel rail barrier. The bridgeworks are scheduled from mid February through to mid spring 2016.

Traffic

Every effort will be made to minimise disruption and inconvenience to residents, business owners and drivers, however we ask you to plan your trips along the Great Ocean Road, as some delays can be expected.

The bridgeworks will necessitate a closure of one side of the road at a time to enable reconstruction of the bridge one half at a time. Unfortunately this will leave only one lane for traffic with temporary traffic lights in place to ensure safety of road users and roadworkers.

Access to and through Separation Creek during the works will be maintained at all times.

Beach Access and Parking Restrictions

Beach access will be available at all times and some parking restrictions may be required. However, the project will be managed to reduce the impact of the works.

Map

See the attached map for the location of the works.
