SOUTHERN OTWAY LANDCARE GROUP

SOLG is a grass roots organisation dedicated to protecting & restoring our environment so that we can live, work & find joy in a healthy and balanced environment. SOLG plays a central role in the protection of biodiversity & the promotion of sustainable land management across our network area. SOLG is an umbrella that unifies 4 landcare groups extending from Wye River in the east to Johanna in the west.

SOLG diverse projects include: weed & pest control, revegetation biodiversity enhancement, threatened species, conservation & education. The SOLG will be at the helm of the 2017 reveg season at the fire effected area of Wye River & Separation Creek. Their incredible group volunteers will join them in replanting trees back into the environment.

The local community (foot soldiers) of Wye River & Separation Creek are passionate, focused & devoted to the 2017 re-veg season. As the community continues on with the hard road ahead after the Christmas Day Bushfires, they can finally look forward to planting trees back into the environment. The ongoing work these amazing like-minded people do year in/ year out goes unheard of. Without these dedicated people giving so much of their time, the local environment would suffer even more pressure

When you sponsor 'One For The Otways' you're helping get trees into the environment of Wye River & Separation Creek. please visit onefortheotways
